Revamped UI: Completely transformed the cab request popup interface from its previous design to a new, modernized look and feel. The overhaul includes redesigned layouts, updated color schemes, and improved visual elements, ensuring a fresh and contemporary user experience.

Enhanced Visuals: Implemented new color schemes and layout improvements for a more visually appealing experience. Adjusted font dimensions for larger devices to ensure optimal readability and visual consistency across various screen sizes.

Dynamic Button Animation: Integrated a dynamic color animation for the accept ride button, smoothly transitioning from light green to gray over a specified duration.

Efficient Cancellation: Optimized cancellation functionality for swift and efficient handling of trip request cancellations. Introduced a new API endpoint, "DeclineAllTripRequest," to allow for the bulk cancellation of all trip requests at once. Implemented the functionality to pass passenger IDs and message codes as a JSON array, enabling seamless cancellation processing on the server side.
