Description

For multiple destination trips, the kilometer calculation is wrong. starting and ending positions are only considered for the final amount calculation. actually want to consider the whole travel distance for amount calculation.

STR.

1. Open the rider app.
2. Request a round trip.
3. Accept and complete the trip.
4. Check the fare amount.

ER.

4. Amount should be calculated based on the total distance traveled.

AR

4. Only consider the distance between the start and end point.
