Description			
Inform the rider if he is in queue for a trip.			
To improve user experience and reduce confusion when a rider has already booked a step trip while currently on an active trip, we need to display clear queue status information.

Push notification doesnt work as usual

#9 - 10/22/2024 08:35 AM - Sreedevi K S

Added a Marker on the DriverDetailFragmentV2 to indicate the driver's current trip destination when the rider takes a queued trip.

Updated the Verification Code Title and its associated PIN field to improve clarity and usability.

Handled the Directions API to provide proper route guidance based on the trip state (queued or active). This includes handling map updates and the

verification PIN field according to whether the trip is in a queued state or an active trip state.

1. OTP is not showing in the rider app, even though the rider marked his arrival status.
2. No need to show the "time to reach" pick up point for the queued trip.
3. The screen should focus on the current trip destination instead of the pickup location.

Resolved the issue where the OTP was not displaying in the rider app after the rider marked arrival status.
Updated the app to hide the "time to reach" for queued trips.
Adjusted the screen to focus on the current trip destination marker instead of the pickup location, resolving the focus issue.
