<b>Description</b>			
Rider map zoom level has to be scaled. The current zoom level makes it difficult to see the driver's arrival progress.  We need to zoom in more to view map directions.			
<b>Impact Analysis</b>			
1. The zoom level on the Google Map was adjusted from 15.0F to 14.6F for a more refined view. 2. A smooth animation transition was applied to the Google Map marker for enhanced visual appeal.

After accepting the ride, the driver and the pick-up location must be more focused and properly aligned on the map. It was noticed that the map automatically zoomed in and out at certain points while approaching the pick-up location. As the driver neared the pick-up point, the map zoom functioned smoothly and remained focused.
