UI Rewamp - Trip request **failed in falcon**

- 1,Set timer from the old UI in right top corner of each trip request item **passed**
- 2,Show close icon image with same ui instead of cancel all button **passed**
- 3,Remove background and make transparent to the Cab Requested Screen **passed**

Issue in spacing **failed suggestion**

- 1,Reduce the space in total count area at the top
- 2,Reduce the font size of the cost and the timer
- 3,In a page try to display 2 trip request or atleast half details of the second trip request

#15 - 05/16/2025 06:27 AM - Sreedevi K S

1. **Reduce the space in the total count area at the top** – Done
2. **Reduce the font size of the cost and the timer** – Done
3. **Display 2 trip requests or at least half of the second trip request on the same page** –

This cannot be guaranteed because the size of the trip request card is not fixed, and Android devices vary widely in screen size and resolution. If we try to display one and a half trip requests on all screens, it may break the UI on smaller devices. (One & half Trips can be visible in OPPO)
(Currently, a scroll feature is available to handle multiple trip requests. Additionally, the current size of each trip request card closely follows the design provided by the marketing team. Any change or reduction in card size should be discussed with them before proceeding.)
