<b>Description</b> According to the functional requirements, the fare breakdown must be organized by their respective categories (e.g., base fare, taxes, surcharges, discounts, etc.). Each category should be displayed within a collapsible view to allow users to expand or collapse the details as needed. This will help improve the readability and user experience by minimizing information overload, especially when the fare structure includes multiple components. The collapsible sections should be clearly labeled with the category name, and the expanded view should display all relevant fare components under that category.
