- Impact Analysis updated

#9 - 06/12/2025 09:10 AM - Sreedevi K S

- Status changed from Reopened to Resolved

Issue:

When the "Cancel Trip" icon is clicked, a popup is shown asking for confirmation.

If the user selects "No", a loader appears and doesn't stop, eventually causing the app to crash after a few seconds.

Root Cause:

The loader was not hidden after the successful response from the GetCancelReason API.

Additionally, there was an issue with the improper initialization of the AlertDialog, which might lead to unexpected behavior or crashes.

Fix Implemented:

Loader Handling : Added logic to dismiss/hide the loader immediately after receiving a successful response from the GetCancelReason API.

Alert Dialog Initialization : Reorganized and safely initialized the AlertDialog .
