<b>Description</b>			
<b>Impact Analysis</b> Search pickup location Search dropoff location Confirm pickup Set location on map			

#### History

##### #1 - 03/19/2025 09:32 AM - Anupama P

- Milestone deleted (Sprint 27 Tukxi Ride 2025 Feb 03 to Feb 28)

- Milestone set to Sprint 28 Tukxi Ride 2025 Mar 01 to Mar 31

##### #2 - 03/20/2025 12:47 AM - Sreedevi K S

- Branch name changed from sprint-27\_anupama\_3667 to sprint-25\_sreedevi\_4508\_

##### #3 - 04/07/2025 04:06 AM - Sreedevi K S

- Due date changed from 03/21/2025 to 04/07/2025

- Start date changed from 03/12/2025 to 04/03/2025

##### #4 - 04/07/2025 04:06 AM - Sreedevi K S

- Status changed from New to In Progress

##### #5 - 04/07/2025 04:08 AM - Sreedevi K S

- Status changed from In Progress to Resolved

##### #6 - 05/26/2025 08:40 AM - Anupama P

- Subject changed from fetchAPIDetails Node API Integration in SearchlocationActivity to Android Rider:- fetchAPIDetails Node API Integration in SearchlocationActivity

- Status changed from Resolved to QA Ready

##### #7 - 06/03/2025 01:30 AM - Firosha Fathima

- Status changed from QA Ready to Reopened

Android Rider:- fetchAPIDetails Node API Integration in SearchlocationActivity **failed**

#### Issue:

Upon the first login, while searching for 'pickup' and 'Where To' location suggestions do not appear; however, after the rider app is closed and reopened, the suggestions are visible. **failed**

##### #8 - 06/03/2025 01:36 AM - Anupama P

- Impact Analysis updated

**#9 - 06/12/2025 04:41 AM - Sreedevi K S**

**Issue:**

On first login, pickup and drop location suggestions do not appear while searching. However, after closing and reopening the app, suggestions work as expected.

**Root Cause:**

The issue was due to `GOOGLE_SERVER_ANDROID_PASSENGER_APP_KEY` being null or missing during the first login session.

In the updated Node API implementation, this key is now meant to be fetched and stored only from the `generalConfig` API. However, in the older implementation, it was also redundantly fetched from:

`getDetail` API

`verifyOtp` API

The old code for storing this key from multiple sources was not removed, and since `getDetail` and `verifyOtp` responses no longer include this key, they were overwriting the correct key from `generalConfig` with an empty/null value.

**Fix Implemented:**

Removed the redundant key storage logic from `getDetail` and `verifyOtp` API response handling.

Now, `GOOGLE_SERVER_ANDROID_PASSENGER_APP_KEY` is fetched and stored only once from `generalConfig`, as per the latest API structure. This ensures the correct key is consistently available for location suggestions immediately upon login.

**#10 - 06/12/2025 04:42 AM - Sreedevi K S**
