Milestone:	Sprint 29 Tukxi Ride 2025 Apr 02 to June 27	Branch name:	

Description

Create the error message based on the error. Currently it shows the message "Can't communicate to the server" for all the errors. So, it needs to change the message based on the error that happened in the application. If it is a network-related error, it shows the messages lead to that or are based on the server, and the messages are related to server issues.
